Description

Dakota Service Body - 98" Single Wheel - Flat Top Design

Dakota Bodies recently updated their service body design to not only look sharp, but to perform to today and tomorrow's expectations. Their Gen II Service Bodies are welded together to provide a long-term, solid connection between parts to achieve exceptional structural integrity. Service Bodies are used for many different job trades. And with no trade being the same, why should your truck be? Build a custom service body for YOUR job trade

Standard Features:

- Zinc Rich primer coating for superior corrosion resistance
- Dakota Bodies white powder coat is our universal white providing durable powder coat protection
- Bumper protected with Black Lava powder coat, providing a non-slip surface
- Crash zone style bumper mounting brackets provide that "extra zone of forgiveness"
- Vertical receiver tube in bumper for optional vise mounting plate
- Surface mounted LED rear lighting
- Double panel compartment doors with internal reinforcements
- Compression T-handle door latches
- Gas cylinder style door holders
- Automotive bulb type weather strip
- Uni-Strut on each side wall to provide infinite shelving adjustment
- 250 lbs capacity, 18 gauge galvanized adjustable shelving with adjustable dividers
- 2 shelves in front vertical compartments and one shelf in rear verticals are standard
- Long tool pass through knock out panel between horizontal & rear vertical
- One hand operation tailgate that drops flush with cargo floor without support chains
- Fuel filler cup on streeside
- Universal mounting kit for ease of up-fitting
- Cast aluminum fenderettes
